

DR600

DMR REPEATER

As a DMR repeater product with standard extensible design, all-digital functionality, the DR600 helps to improve management efficiency and a faster response in emergency situations.

DR600 DMR Repeater

KEY FEATURES AND BENEFITS

Professional IU Design

Standard & Extensible IU Design saves installation space, and easy to expand working as transceiver of trunking base station.

Outstanding Heat Dissipation

The unique cooling design combines a built-in heat pipe and three fans to ensure efficient heat dissipation, preventing the repeater from over-heating in high output power mode.

Smart Digital-Analog Auto Detection

DR600 can be configured to analog, digital or mixed mode. In mixed mode, the repeater can dynamically switch between modes regarding on received signal type.

Accessory Expansion

DR600 supports third party development via a rear port of the repeater. This is achieved via the pin control through the repeater rear port.

IP Multi-site Connect

DR600 repeaters can be connected via TCP/IP network to expand the coverage area, working in digital or analog mode.

LED Indicator

DR600 has 9 LEDs to indicate different status such as power-on, analogue repeating, digital repeating, transmitting, receiving, alarm, etc.

AIS/SIP Interface

DR600 provides AIS/SIP second development interface, allowing dispatch, telephone system and other facilities to be developed by the third party.

Remote Monitor and Diagnosis

DR600 supports remote monitor/diagnosis and status control.

Contiguous Wave Identification(CWID)

DR600 supports analog transmission of the repeater identification in Morse code format.

DMR Tier3 Upgradable

DR600 repeater can support DMR Tier3 mode with software upgrading.

All specifications are tested according to applicable standards, and subject to change without notice due to continuous development.
